

## About Omm

This is written in the Omm Writer app. I bought it after a tip. I really don't know if I enjoy the music bit, but it could also be what makes it a difference from other writing apps.

I usually use Apple Notes. For a while I was writing in la Writer and I still do sometimes. If you don't have anything important to write, well, that's the main problem – not the choice of app.

But the feeling here is good. I like how the letters present themselves on the screen, and the background is smooth and as undisturbing it can get.

Does it work with links? No, you can't add links in the program, you got to do that afterwards. But on the other hand, it keeps you stay here. To write some more.

Check it out: <https://ommwriter.com/>
